

Publications of Seogjoo Jang

1. Seogjoo Jang, Kook Joe Shin, and Sangyoub Lee ; “Effects of excitation migration and translational diffusion in the luminescence quenching dynamics”, *J. Chem. Phys.* **102**, 815 (1995)
2. Seogjoo Jang and Gregory A. Voth ; “Simple reversible Molecular Dynamics algorithms for Nosé-Hoover chain dynamics”, *J. Chem. Phys.* **107**, 9514 (1997)
3. Seogjoo Jang and Gregory A. Voth ; “Lithium impurity recombination in solid *para*-hydrogen: A path integral quantum transition state theory study”, *J. Chem. Phys.* **108**, 4098 (1998)
4. Seogjoo Jang and Gregory A. Voth ; “Response to Comment on Simple reversible Molecular Dynamics algorithms for Nosé-Hoover chain dynamics”, *J. Chem. Phys.* **110**, 3626 (1999)
5. Seogjoo Jang and Gregory A. Voth ; “Path integral centroid variables and the formulation of their exact real time dynamics”, *J. Chem. Phys.* **111**, 2357 (1999)
6. Seogjoo Jang and Gregory A. Voth ; “A derivation of centroid molecular dynamics and other approximate time evolution methods for path integral centroid variables ”, *J. Chem. Phys.* **111**, 2371 (1999)
7. Pierre-Nicholas Roy, Seogjoo Jang, and Gregory A. Voth ; “Feynman path centroid dynamics for Fermi-Dirac statistics ”, *J. Chem. Phys.* **111**, 5303 (1999)
8. Soonmin Jang, Seogjoo Jang, and Gregory A. Voth ; “Quantum molecular dynamics simulations of low-temperature high energy density matter : Solid p – H₂/Li and p – H₂/B ”, *J. Phys. Chem. A* **103**, 9512 (1999)
9. Seogjoo Jang, Charles D. Schwieters, and Gregory A. Voth ; “A modification of path integral quantum transition state theory for asymmetric and metastable potentials ”, *J. Phys. Chem. A* **103**, 9527 (1999)
10. Seogjoo Jang and Gregory A. Voth ; “A relationship between centroid dynamics and path integral quantum transition state theory ”, *J. Chem. Phys.* **112**, 8747 (2000)
11. David R. Reichman, Pierre-Nicholas Roy, Seogjoo Jang, and Gregory A. Voth ; “A Feynman path centroid dynamics approach for the computation of time correlation functions involving nonlinear operators ”, *J. Chem. Phys.* **113**, 919 (2000)
12. Seogjoo Jang and Jianshu Cao ; “Nonadiabatic instanton calculation of multistate electron transfer reaction rate: Interference effects in three and four states systems”, *J. Chem. Phys.* **114**, 9959 (2001)
13. Sara E. Dempster, Seogjoo Jang, and Robert J. Silbey ; “ Single molecule spectroscopy of disordered circular aggregates: A perturbation analysis ”, *J. Chem. Phys.* **114**, 10015 (2001)
14. Seogjoo Jang, Sara E. Dempster, and Robert J. Silbey ; “ Characterization of the static disorder in the B850 band of LH2 ”, *J. Phys. Chem. B* **105**, 6655 (2001)
15. Seogjoo Jang, Soonmin Jang, and Gregory A. Voth ; “ Applications of higher order composite factorization schemes in imaginary time path integral simulations”, *J. Chem. Phys.*, **115**, 7832 (2001)

16. Seogjoo Jang, Younjoon Jung, and Robert J. Silbey ; “ Nonequilibrium generalization of Förster-Dexter theory for excitation energy transfer”, Chem. Phys., **275**, 319 (2002)
17. Seogjoo Jang, Jianshu Cao, and Robert J. Silbey ; “Fourth order quantum master equation and its Markovian bath limit”, J. Chem. Phys., **116**, 2705 (2002); **117**, 10428 (2002)
18. Seogjoo Jang, Jianshu Cao, and Robert J. Silbey ; “On the temperature dependence of molecular line shapes due to linearly coupled phonon bands”, J. Phys. Chem. B **106** 8313 (2002)
19. Seogjoo Jang and Jianshu Cao ; “Optimal quantum control in dissipative environments : General formalism and perturbative limits ”, in Laser Control and Manipulation of Molecules (ACS Symposium Series) **821**, 132 (2002)
20. Seogjoo Jang and Robert J. Silbey; “ Theory of single molecule line shapes of multichromophoric macromolecules”, J. Chem. Phys. **118**, 9312 (2003)
21. Seogjoo Jang and Robert J. Silbey; “Single complex line shapes of the B850 band of LH2”, J. Chem. Phys. **118**, 9324 (2003)
22. Seogjoo Jang, Marshall D. Newton, and Robert J. Silbey; “Multichromophoric Förster-Dexter Transfer”, Phys. Rev. Lett. , Submitted (2003)
